Higher Education Re-formed Peter Scott 2005-08-18 Specially commissioned contributions edited by some of the most respected academics currently working in the field of higher education, drawing the situation as it is now and looking forward to the developments of the coming years. It asks questions such as will 'Dearing' prove to be little more than a stop-gap? What will be the balance of power between education institutions, the state and the private sector? What are the realities behind 'lifelong learning', and what form will it take if it steps out of the realms of theory?

National Identities in Soviet Historiography Harun Yilmaz 2015-02-20 Under Stalin's totalitarian leadership of the USSR, Soviet national identities with historical narratives were constructed. These constructions envisaged how nationalities should see their imaginary common past, and millions of people defined themselves according to them. This book explains how and by whom these national histories were constructed and focuses on the crucial episode in the construction of national identities of Ukraine, Azerbaijan and Kazakhstan from 1936 and 1945. A unique comparative study of three different case studies, this book reveals different aims and methods of nation construction, despite the existence of one-party rule and a single overarching official ideology. The study is based on work in the often overlooked archives in the Ukraine, Azerbaijan, and Kazakhstan. By looking at different examples within the Soviet context, the author contributes to and often challenges current scholarship on Soviet nationality policies and Stalinist nation-building projects. He also brings a new viewpoint to the debate on whether the Soviet period was a project of developmentalist modernization or merely a renewed 'Russian empire'. The book concludes that the local agents in the countries concerned had a sincere belief in socialism—especially as a project of modernism and development—and, at the same time, were strongly attached to their national identities. Claiming that local communist party officials and historians played a leading role in the construction of national narratives, this book will be of interest to historians and political scientists interested in the history of the Soviet Union and contemporary Eastern Europe, the Caucasus and Central Asia. *A Course in Russian History* V.O. Kliuchevskii 2016-09-16 This work by the great 19th-century historian is available once again in an acclaimed 1968 translation that conveys the beauty of Kliuchevsky's language and the power of his ideas. In this volume, Kliuchevsky untangles the confused events of the Time of Troubles and the emergence of the Romanov dynasty, and develops his interpretation of the century as prologue to the Petrine reforms. He dramatically underlines the cultural divide between old Russia and the emergent autocracy and the strangely ambivalent relationship between Russia and the West.

Eastern European Mathematics Education in the Decades of Change Alexander Karp 2020-05-04 This contributed volume is devoted to the recent history and evolution of mathematics education in Eastern Europe, exploring how it was influenced by social and political changes in this part of the world. Despite the broad recognition of the importance of these changes, little scholarship exists that examines the ways in which they were followed by changes in the teaching of mathematics in the post-socialist countries. Indeed, the analyzed processes are complex and vary across the states. Accordingly, this book touches on many factors—including differences in cultures and traditions – that find expression in the teaching of mathematics. Specifically, this volume seeks to explore what changes there were in education in general and in the position of mathematics in school education in these years, and how these changes may be explained and documented; what changes there were in the content of mathematics education and its assessment, and how were they motivated and adopted; what new textbooks appeared and what new methodological ideas were offered in them; how and why mathematics teacher education and/or professional development changed; what was the role (if any) of foreign influences on mathematics education, etc.The book will be of interest to both researchers in mathematics education and practitioners-teachers, as well as a broader audience of historians and educators exploring the political aspects of education.

Putin's 'preventive Counter-revolution' Robert Horvath 2013 This book examines the 'preventive counter-revolution,' a programme of reforms and repression that transformed the face of Russian politics during Vladimir Putin's second term as president. Kremlin propagandists hailed this programme as a defence of national sovereignty against Western attempts to foment a 'velvet revolution' in Russia. But this book shows that the Putin regime was reacting to a real domestic threat: opposition leaders and youth activists who had begun to employ 'velvet' revolutionary methods in a campaign to harness popular grievances and to challenge Putin in the streets and at the ballot box. It traces the formulation and implementation of the regime's two-track response, which was based on a careful analysis of the lessons of the recent 'velvet' (or 'coloured') revolutions in Georgia and Ukraine. The first track was repressive: the imposition of controls on NGOs, restrictions on electoral competition, and a crackdown on opposition demonstrations. The second was the mobilisation of supporters in 'patriotic' youth organisations that employed both gang violence and 'velvet' revolutionary techniques. Drawing on a wide range of Russian-language sources, including opposition activists' blogs, this book charts the end of Russia's experiment with liberal democracy and the emergence of a new type of authoritarian order.

Russian and Soviet Health Care from an International Perspective Susan Grant 2017-02-20 This collection compares Russian and Soviet medical workers – physicians, psychiatrists and nurses, and examines them within an international framework that challenges traditional Western conceptions of professionalism and professionalization through exploring how these ideas developed amongst medical workers in Russia and the Soviet Union. Ideology and everyday life are examined through analyses of medical practice while gender is assessed through the experience of women medical professionals and patients. Cross national and entangled history is explored through the prism of health care, with medical professionals crossing borders for a number of reasons: to promote the principles and advancements of science and medicine internationally; to serve altruistic purposes and support international health care initiatives; and to escape persecution. Chapters in this volume highlight the diversity of experiences of health care, but also draw attention to the shared concerns and issues that make science and medicine the subject of international discussion.

Re-Constructing Grassroots Holocaust Memory Irina Rebrova 2020-10-26 The main objective of the book is to allocate the grass roots initiatives of remembering the Holocaust victims in a particular region of Russia which has a very diverse ethnic structure and little presence of Jews at the same time. It aims to find out how such individual initiatives correspond to the official Russian hero-orientated concept of remembering the Second World war with almost no attention to the memory of war victims, including Holocaust victims. North Caucasus became the last address of thousands of Soviet Jews, both evacuees and locals. While there was almost no attention paid to the Holocaust victims in the official Soviet propaganda in the postwar period, local activists and historians together with the members of Jewish communities preserved Holocaust memory by installing small obelisks at the killing sites, writing novels and making documentaries, teaching about the Holocaust at schools and making small thematic exhibitions in the local and school museums. Individual types of grass roots activities in the region on remembering Holocaust victims are analyzed in each chapter of the book.

Nobility and Privilege in Late Imperial Russia Seymour Becker 1988-06 The transformation of the Russian nobility between 1861 and 1914 has often been attributed to the anachronistic attitudes of its members and their failure to adapt to social change. Becker challenges this idea of "the decline of the nobility." He argues that the privileged estate responded positively to change and greatly influenced their nation's political and economic destiny.

Imaging Russia 2000 Anna M. Lawton 2004 "Anna Lawton deftly tells two stories—one about the evolution of Russian film since the collapse of the Soviet Union in 1991, and the other about Russian life during that same period. She managed to capture a vivid portrait of Moscow of the 1990s, and to remind us that the Soviet past remains omnipresent in the new Russia. Russia 2000: Film and Facts is a must read for anyone who cares about Russia, or about film."Blair Ruble, Director, The Kennan Institute of the Woodrow Wilson Center.

The Electrification of Russia, 1880-1926 Jonathan Coopersmith 2016-11-01 The Electrification of Russia, 1880-1926 is the first full account of the widespread adoption of electricity in Russia, from the beginning in the 1880s to its early years as a state technology under Soviet rule. Jonathan Coopersmith has mined the archives for both the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia. Coopersmith shows how the Communist Party forged an alliance with engineers to harness the socially transformative power of this science-based enterprise. A centralized plan of electrification triumphed, to the benefit of the Communist Party and the detriment of local governments and the electrical engineers. Coopersmith's narrative of how this came to be elucidates the deep-seated and chronic conflict between the utopianism of Soviet ideology and the reality of Soviet politics and economics.

Language and Power in the Creation of the USSR, 1917-1953 Michael G. Smith 1998-01-01 CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and practitioners in all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language.

Rewriting History in Soviet Russia R. Markwick 2001-02-01 This book explores the political significance of the development of historical revisionism in the USSR under Khrushchev in the wake of the Twentieth Congress of the CPSU and its demise with the onset of the 'period of stagnation' under Brezhnev. On the basis of intensive interviews and original manuscript material, the book demonstrates that the vigorous rejuvenation of historiography undertaken by Soviet historians in the 1960s conceptually cleared the way for and fomented the dramatic upheaval in Soviet historical writing occasioned by the advent of perestroika.

Translation in Russian Contexts Brian James Baer 2017-07-28 This volume represents the first large-scale effort to address topics of translation in Russian contexts across the disciplinary boundaries of Slavic Studies and Translation Studies, thus opening up new perspectives for both fields. Leading scholars from Eastern and Western Europe offer a comprehensive overview of Russian translation history examining a variety of domains, including literature, philosophy and religion. Divided into three parts, this book highlights Russian contributions to translation theory and demonstrates how theoretical perspectives developed within the field help conceptualize relevant problems in cultural context in pre-Soviet, Soviet, and post-Soviet Russia. This transdisciplinary volume is a valuable addition to an under-researched area of translation studies and will appeal to a broad audience of scholars and students across the fields of Translation Studies, Slavic Studies, and Russian and Soviet history.
