Agreement in Natural Language Center for the Study of Language and Information (U.S.) 1988-07 Although grammatical agreement or concord is widespread in human languages, linguistic theorists have generally treated agreement phenomena as secondary or even marginal. All the papers in this volume, however, take agreement phenomena seriously, as presenting either a general issue in theory construction or a descriptive problem in particular types of languages. The theoretical perspectives range from purportedly theory-neutral typological frameworks to assumptions about the validity of one or another current formal model. Further, the degree of generality ranges from a universalist nature-of-human-language agenda to concern with one or another aspect of grammatical agreement or with agreement in a single language or language group.

The Unknown Stalin Zhores A. Medvedev 2006 This biography of Stalin studies the material from secret Soviet archives that was released when the Union collapsed. In some cases, long-held assumptions are questioned and revised, in others, rumours are put to rest.

Passive and Voice Masayoshi Shibatani 1988-01-01 This volume brings together 18 original papers dealing with voice-related phenomena. The languages dealt with represent both typological and geographic diversity, ranging from accusative-type languages to ergative-type and Philippine-type languages, and from Australia to Africa and Siberia. The studies presented here open up many possibilities for theorizing and offer data inviting formal treatments, but the most important contribution they make is in terms of the insights they offer for a better understanding of the fundamentals of voice phenomena.

Olubomehin 2001 This work is for African students and students of African history, offering a local perspective on the study of history. It considers biography as history, objectivity, oral/non-literate societies and history, archaeology, ideological issues in African historiography and writing Nigerian history. A whole section is given to

a discussion of the challenges facing the twenty-first century Nigerian historian. These are identified as: how to overcome the slump in the study of history, and crisis in identity and relevance after the peak and progress of the late seventies; how to improve the status of history at secondary and tertiary levels, and more generally, how to encourage the wider participation of Nigerian historians in international research networks. The contributors are mainly professors and lecturers at the University of Lagos and Ogun State University.

The Unknown Gulag Lynne Viola 2007 One of Stalin's most heinous acts was the ruthless repression of millions of peasants in the early 1930s, an act that established the very foundations of the gulag. Now, with the opening of Soviet archives, an entirely new dimension of Stalin's brutality has been uncovered.

Lenin and Trotsky – What they really stood for Alan Woods 1976 The ideas of Lenin and Trotsky are without doubt the most distorted and slandered ideas in history. For more than 100 years, they have been subjected to an onslaught from the apologists of capitalism, who have attempted to present their ideas – Bolshevism – as both totalitarian and utopian. An entire industry was developed in an attempt to equate the crimes of Stalinism with the regime of workers' democracy that existed under Lenin and Trotsky. It is now more than fifty years since the publication of the first edition of this work. It was written as a reply to Monty Johnstone, who was a leading theoretician of the Communist Party of Great Britain. Johnstone had published a reappraisal of Leon Trotsky in the Young Communist League's journal *Cogito* at the end of 1968. Alan Woods and Ted Grant used

the opportunity to write a detailed reply explaining the real relationship between the ideas of Lenin and Trotsky. This was no academic exercise. It was written as an appeal to the ranks of the Communist Party and the Young Communist League to rediscover the truth about Trotsky and return to the original revolutionary programme of Lenin. Also included in this new edition is Monty Johnstone's original *Cogito* article, as well as further material on Lenin's struggle with Stalin in the last month of his political life. The foreword is written by Trotsky's grandson, Vsievobod Volkov.

Bibliographie selbständiger und unselbständiger Schriften über L.D. Trockij und den Trotzismus Wolfgang Lubitz 1982 Some 1,900 new items have been added to this revised edition, bringing the total to over 5,000 items on Trotsky and Trotskyism. The scope encompasses all aspects of Trotsky's life and work, his role in history, his ideas, his legacy and his influence. Coverage includes Trotskyist as well as anti-Trotsky and Western as well as Soviet publications. The materials are arranged by subject, and include books, reports, dissertations, pamphlets, essays, memoirs, speeches, interviews and more. Two appendices include the very latest and forthcoming items. Four indices offer numerous access points to the individual entries, which are identified by number. The Failure of a Dream Gidon Cohen 2007-03-30 The Independent Labour Party began the 1930s as a significant force in dispute with the Labour Party proper. In 1932, as

these conflicts led to a split, the party had more MPs in Scotland than the larger organisation and a membership five times that of the British Communist Party. In the first major study of the Independent Labour Party after disaffiliation from the mainstream in 1932, Gidon Cohen draws on archival material from Moscow and newly released police and secret service papers as well as other major British archives. In doing so he explores the culture and politics of an organisation which he argues, contrary to received scholarship, remained an important component of the British left throughout the 1930s. CONTENTS: 1. Introduction 2. The Split 3. Membership and Organisation 4. Electoral Arenas 5. Divided We Fall: Internal Politics 6. Intellectuals, Ideas and Policy 7. Infiltration: Communism and the National Unemployed Workers' Movement 8. The Mainstream: Labour and the Unions 9. Pacifism, Wars and the Internationals 10. Conclusion

International Encyclopedia of Adult Education L. English 2016-04-30 The Encyclopedia of Adult Education is the first comprehensive reference work in this important and fast-growing field, and is an invaluable resource for adult educators who research and teach in the fields of higher education, work in community-based settings, or practise in public or private organizations. Its 170+ articles, written by an international team of contributors from over 17 countries, detail the research and practice of the field from its emergence as a separate discipline to the present day, covering key concepts, issues and individuals and providing a cutting-edge summary of ongoing debates across a wide range of perspectives, from self-directed learning to human resource development. Entries are arranged A-Z and extensive cross-referenced, with

detailed bibliographies for each topic to facilitate further research.

Studies of Passive Clauses Paul Martin Postal 1986-01-01 In this work, Paul M. Postal supports the universalist theory of language by examining passive clauses. Contrary to a skeptical tradition, Postal argues that passive clauses are cross-linguistically identifiable and characterizable. This study proposes refinements of the analysis of the natural language grammatical category Passive Clause. These refinements include an account of the notion 'dummy nominal,' central to the analysis of impersonal passive clauses; additions permitting a proper typology of the major known subtypes of Passive Clause; a generalization permitting application to clauses whose subjects are not earlier level direct objects; and, construction of precise rule concepts to represent restrictions on passive clauses. The passive domain supports the universalist approach in three distinguishable ways: (1) by permitting formulation of otherwise apparently unstatable lawful characteristics of all passive structures; (2) by facilitating statement of language-specific passive constraints holding in diverse languages; and, (3) by allowing uniform statement in grammars of recurrent constraints on

passives. Each mode of support is applied to actual cases based on material from more than a dozen languages from English and French to Quiche (Mayan) and Chi-Mwi:ni (Bantu).

"In addition to revealing the events surrounding the invasion of Czechoslovakia in 1968, this is the first book to document a Cold War crisis from both sides of the Iron Curtain. It is based on unprecedented access to the previously closed archives of each member of the Warsaw Pact, as well as once highly classified American documents from the National Security Council, CIA, and other intelligence agencies." "Presented in a highly readable volume, the book offers top-level documents from Kremlin Politburo meetings, multilateral sessions of the Warsaw Pact leading up to the decision to invade, transcripts of KGB-recorded telephone conversations between Leonid Brezhnev and Alexander Dubcek." "To provide a historical and political context, the editors have prepared essays to introduce each section of the volume. A chronology, glossary and bibliography offer further background information for the reader." appointed by Vaclav Havel to investigate the events of 1967-1970."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

The Trotsky Reappraisal Terry Brotherstone 1992 "In 1988 the Director of State Archives in Moscow, Yuri Afanasyev, declared that in the vital process of re-examining Soviet history Trotsky is 'the biggest blank spot'. Leon Trotsky is certainly one of the most important, talented and enigmatic figures in twentieth-century world history. In *The Trotsky Reappraisal* an exciting mix of Soviet scholars and Western academics offer a pioneering reassessment of Trotsky's personality, his role in the Revolution and the ensuing civil war, and his opposition to Stalinism." "Soviet historians have been released from decades of what one Russian has called 'ignorant certainty', and are now seeking to re-examine many key questions, including the process by which Stalin eliminated opposition and consolidated his power. Such investigations lead in many directions but must include the exploration of the intellectual richness of Marxism - long concealed by Stalinist dogma. In this context, too, the reappraisal of Trotsky is overdue."--BOOK JACKET.Title Summary

Fostering Human Development Through Engineering and Technology Education

Moshe Barak 2012-01-01 *Fostering Human Development Through Engineering and Technology Education (ETE)* is a collaborative work offered to students, scholars, researchers, decision-makers, curriculum developers, and educators interested

in the rich learning opportunities afforded by engineering and technology education. This book provides perspective about the roles ETE might uniquely play in applying contemporary pedagogical practices to enhance students' intellectual, cognitive, and social skills in the service of promoting equitable and sustainable human development. Education about engineering and technology has become an imperative for all people due to the exponential rate of technological change, the impact of globalization on culture and economy, and the essential contributions engineering and technology make in addressing global and environmental challenges. Many of today's students wish to use their education to influence the future, and school-based engineering and technology education programs meet the needs of these "millennial students" who are civic-minded, team-oriented, and want to make a difference. Therefore, support has been rapidly increasing for the establishment of school-based engineering and technology education (ETE) programs in many countries across the globe. Chapters in this book provide discussion about dimensions of learning; capabilities, concepts and skills for third millennial learners; culturally relevant learning through ETE; and the promise of new pedagogies such as gaming and other project-based learning approaches in our digitally connected world. The author team includes renowned educational theorists, cognitive scientists, scientists and engineers, instructional designers, expert practitioners, and researchers who have coalesced best practice and contemporary thought from seven countries.

Czechoslovakia's Interrupted

Revolution Harold Gordon Skilling

2015-03-08 For about eight months in 1968 Czechoslovakia underwent rapid and radical changes that were unparalleled in the history of communist reform; in the eight months that followed, those changes were dramatically reversed. H. Gordon Skilling provides a comprehensive analysis of the events of 1968, assessing their significance both for Czechoslovakia and for communism generally. The author's account is based on all available written sources, including unpublished Communist Party documents and interviews conducted in Czechoslovakia in 1967, 1968, and 1969. He examines the historical background, the main reforms and political forces of 1968, international reactions, the Soviet intervention, and the experiment's collapse, concluding with his reasons for regarding the events of the Prague spring as a movement of revolutionary proportions. Intercultural Crisis Communication

Christophe Declercq 2019-11-14

Intercultural Crisis Communication poses pertinent questions and provides powerful responses to crises that have characterised the modern world since 2010. Language mediation in situations of disaster, emergency and conflict is an under-developed area of scholarship in Translation Studies. This book responds to a clear need for research drawn from practical experiences in the field and explores the crucial role of translation, interpretation and mediation in contexts of crises. Particular consideration is given to situations where rare or minority languages represent a substantial obstacle to humanitarian operations. Contemporary case studies from the USA, Africa, Europe, and Armenia provide major examples of crisis communication that call for more efficient language mediation. Such examples include Syrian displacement, the refugee crisis in Croatia and Italy, international terrorism and national public administration, interpreting in conflict and for Médecins sans Frontières, as well as the integration of refugee doctors for employment in the UK. With contributions from experts in the field, this volume is of international relevance and provides a multifaceted overview of

intercultural communication issues and remedies during crises.

Theory and Practice of Specialised

Online Dictionaries Pedro A. Fuertes-

Olivera 2014-09-23 This book is the first comprehensive monograph on the Function Theory of Lexicography, which originated at the Aarhus School of Business (Aarhus University). Function Theory considers dictionaries to be tools that are constructed for assisting specific users with punctual needs in specific usage situations, e.g. communicative-oriented situations and cognitive-oriented situations. The book's main focus is on defending the independent academic status of lexicography and its corollary: The process of designing, compiling and updating (specialised) online dictionaries needs a theoretical framework that addresses general and specific aspects. The former are common to all types of information tools, the latter are mainly dependent on the media for which the information tool is constructed and their specific target users. This book offers both aspects and moves from the highest level of abstraction to very detailed aspects of lexicographic work, e.g. how to convert an originally-conceived polyfunctional online dictionary into several monofunctional usage-based ones. The book illustrates that the theory and the methodology currently used by advocates of the Function Theory of Lexicography offers better results than other approaches and therefore makes its case for proposing the Function Theory for terminological/terminographical work.
