In Defense of Anthropology Herbert S. Lewis 2017-09-08 This book argues that the history and character of modern anthropology has been egregiously distorted to the detriment of this intellectual pursuit and academic discipline. The "critique of anthropology" is a product of the momentous and tormented events of the 1960s when students and some of their elders cried, "Trust no one over thirty!" The Marxist, postmodern, and postcolonial waves that followed took aim at anthropology and the result has been a serious loss of confidence; both the reputation and the practice of anthropology has suffered greatly. The time has come to move past this damaging discourse. Herbert S. Lewis chronicles these developments, and subjects the "critique" to a long overdue interrogation based on wide-ranging knowledge of the field and its history, as well as the application of common sense. The book questions discourses about anthropology and colonialism, anthropologists and history, the problem of "exoticizing'the Other," anthropologists and the Cold War, and more. Written by a master of the profession, In Defense of Anthropology will require consideration by all anthropologists, historians, sociologists of science, and cultural theorists.

Social Work in Europe Charlotte Williams 2013-09-13 It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the European Journal of Social Work.

Critical Junctions Don Kalb 2005 "A book about theory and method in the humanities and social sciences. It reacts to what has become known as the "cultural turn," a shift toward semiotics, discourse, and representations and away from other sorts of determinations that started in the early 1980s and that has dominated social thinking for a long string of years. The book is based in a reconsideration of the meeting of two disciplines that helped to launch the cultural turn: anthropology and history. Specifically, it criticizes the ideas of hermeneutics and "thick description" (Clifford Geertz) that have come to play a key role in the encounter of anthropology and history and then in the cultural turn. It led to the renewed cherishing of what Gupta and Ferguson have called paradigms of "peoples and places," saturated pictures of universes, both small and large, of meaning in a more or less frozen standstill-an intellectual precursor to the cultural xenophobia of our times. Against this, the present book embraces praxis and "critical junctions": the connections in space (in and out of a relations of power and dependency, and what Eric Wolf has called the "interstitial relations" between apparently separate institutional domains. In this way the book adds to the current revival of institutionally based "global ethnography," which studies "up and outward" (the journal of Ethnography is a good example)."-- Preface.

The Evolution of Social Institutions Dmitri M. Bondarenko 2020-09-12 This book presents a novel and innovative approach to the study of social evolution using case studies from the Old and the New World, from prehistory to the present. This approach is based on examining social evolution through the evolution of social institutions.

Evolution is defined as the process of structural change. Within this framework the society, or culture, is seen as a system composed of a vast number of social institutions that are constantly interacting and changing. As a result, the structure of society as a whole is also evolving and changing. The authors posit that the combination of evolving social institutions explains the non-linear character of social evolution and that every society develops along its own pathway and pace. Within this framework, society should be seen as the result of the compound effect of the interactions of social institutions specific to it. Further, the transformation of social institutions and relations between them is taking place not only within individual societies but also globally, as institutions may be trans-societal, and even institutions that operate in one society can arise as a reaction to trans-societal trends and demands. The book argues that it may be more productive to look at institutions even within a given society as being parts of trans-societal systems of institutions since, despite their interconnectedness, societies still have boundaries, which their members usually know and respect. Accordingly, the book is a must-read for researchers and scholars in various disciplines who are interested in a better understanding of the origins, history, successes and failures of social institutions.

Ethics in Obstetrics and Gynecology Laurence B. McCullough 1994 This book offers a comprehensive and clinically practical approach to ethics in the everyday practice of obstetrics and gynecology. The topics the authors address include: contraception, abortion, selective termination of multifetal pregnancies, gynecologic cancer, in vitro fertilization, surrogacy, prenatal diagnosis, fetal therapy, cephalocentesis, prematurity, HIV infection, and court ordered cesarean delivery. The issues involved in making decisions in many of these areas are a source of conflict, and lead to crisis between the physician and patient. One of the book's strengths is its emphasis on prevention and, if prevention fails, management, of the conflicts and crises which arise in these areas of medicine. The authors develop their preventative and management strategies on the basis of a framework for bioethics in the clinical setting. This framework is rigorously established and defended. The authors argue that four virtues -- self effacement, self sacrifice, compassion, and integrity -- generate the physician's obligation to protect and promote the patient's interest. They then identify the three types of patient's interests -- social role interests, subjective interests, and deliberative interests -- and they reinterpret the ethical principles of beneficence and respect for

autonomy in terms of these. The concept of the fetus as patient, the physician's obligation to third parties, and the moral standing of fathers and family members are also addressed. The implications of their argument sets the stage for the discussions of prevention and management in the remaining sections of the book. Ethics in Obstetrics and Gynecology is a unique addition to the literature in both biomedical ethics and obstetrics and gynecology. It demonstrates that ethics should be regarded as an essential part of obstetrics and gynecology, and that clinical practice is incomplete without it.

Healing Gardens Clare Cooper Marcus 1999-06-15 Although the healing qualities of nature have been recognized and relied on for centuries as a valuable part of convalescence, recent history has seen nature's therapeutic role virtually eclipsed by the technological dominance of modern medicine. As the twentieth century comes to a close and the medical community reacknowledges the importance of the environment to recovery, the healing garden is emerging as a supplement to drug- or technology-based treatments. Healing Gardens celebrates this renewed interest in nature as a catalyst for healing and renewal by examining the different therapeutic benefits of healing gardens and offering essential design guidance from experts in the field. Unique and comprehensive, Healing Gardens provides up-to-date coverage of research findings, relevant design principles and approaches, and best practice examples of different types of healing gardens. It begins by exploring what current research reveals about the connection between nature, human stress reduction, and medical outcomes. It then presents case studies and design guidelines for outdoor spaces in medical settings that include general, psychiatric, and children's hospitals as well as hospices, nursing homes, and Alzheimer's facilities. Historical information, literature reviews, and studies on use are included for each type of outdoor space covered, offering important insights into what works in healing gardens and what doesn't. Generously supplemented with photographs, site plans, anecdotes, and more, Healing Gardens is an invaluable practical guide for landscape architects and others involved in creating and maintaining medical facilities, and an extremely useful reference for those responsible for patient care. A unique and comprehensive look at the therapeutic effects and design of healing gardens For more and more people, the shortest road to recovery is the one that leads through a healing garden. Combining up-to-date information on the therapeutic benefits of healing gardens with practical design guidance from leading experts in the field, Healing Gardens is an important resource for landscape architects and others working in this emerging area. With the help of site plans, photographs, and more, it presents design guidelines and case studies for outdoor spaces in a range of

medical settings, including: * Acute care general hospitals. * Psychiatric hospitals. * Children's hospitals. * Nursing homes. * Alzheimer's facilities. * Hospices.

Citizenship and the Legitimacy of Governance Dr Giuliana B Prato 2012-12-28 Against the background of unease at the increasingly loose and conflictual relationship between citizenship and governance, this book brings together rich, ethnographic studies from EU member states and post-Communist and Middle-Eastern countries in the Mediterranean Region to illustrate the crisis of legitimacy inherent in the weakening link between political responsibility and trust in the exercise of power. With close attention to the impact of the ambiguities and distortions of governance at the local level and their broader implications at the international level, where a state's legitimacy depends on its democratic credentials, Citizenship and the Legitimacy of Governance initiates a comparative discussion of the relationship between established moralities, politics, law and civil society in a highly diversified region with a strong history of cultural exchange. Demonstrating that a comparative anthropological analysis has much to offer to our understanding, this volume reveals that the city is a crucial arena for the renegotiation of citizenship, democracy and belonging.

Stand Firm Paul Gould 2018-11 In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. Stand Firm: Apologetics and the Brilliance of the Gospel argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.
