Intonation and Prosodic Structure Caroline Féry 2016-12-22 This book provides a state-of-the-art survey of intonation and prosodic structure. Taking a phonological perspective, it shows how morpho-syntactic constituents are mapped to prosodic constituents according to well-formedness conditions. Using a tone-sequence model of intonation, it explores individual tones and how they combine, and discusses how information structure affects intonation in several ways, showing tones and melodies to be 'meaningful' in that they add a pragmatic component to what is being said. The author also shows how despite a superficial similarity, languages differ in how their tonal patterns arise from tone concatenation. Lexical tones, stress, phrase tones, and boundary tones are assigned differently in different languages, resulting in great variation in intonational grammar, both at the lexical and sentential level. The last chapter is dedicated to experimental studies of how we process prosody. The book will be of interest to advanced students and researchers in linguistics, and particularly in phonological theory.

Science Education and Culture Fabio Bevilacqua 2012-12-06 This anthology contains selected papers from the 'Science as Culture' conference held at Lake Como, and Pavia University Italy, 15-19 September 1999. The conference, attended by about 220 individuals from thirty countries, was a joint venture of the International History, Philosophy and Science Teaching Group (its fifth conference) and the History of Physics and Physics Teaching Division of the European Physical Society (its eighth conference). The magnificent Villa Olmo, on the lakeshore, provided a memorable location for the presentors of the 160 papers and the audience that discussed them. The conference was part of local celebrations of the bicentenary of Alessandro Volta's creation of the battery in 1799. Volta was born in Como in 1745, and for forty years from 1778 he was professor of experimental physics at Pavia University. The conference was fortunate to have had the generous financial support of the Italian government's Volta Bicentenary Fund, Lombardy region, Pavia University, Italian Research Council, and Kluwer Academic Publishers. The papers included here, have or will be, published in the journal *Science & Education*, the inaugural volume (1992) of which was a landmark in the history of science education publication, because it was the first journal in the field devoted to contributions from historical, philosophical and sociological scholarship. Clearly these 'foundational' disciplines inform numerous theoretical, curricular and pedagogical debates in science education. Contemporary Concerns The research promoted by the International and European Groups, and by the journal, is central to science education programmes in most areas of the world.

A Cognitive Linguistic Analysis of the English Imperative Hidemitsu Takahashi 2012 This volume offers the first comprehensive description of English imperatives made from a Cognitive Linguistic perspective. It proposes a new way of explaining the meaning and function of the imperative independently of illocutionary act classifications, which allows for quantifying the strength of imperative force in terms of parameters and numerical values. Furthermore, the book applies the theory of Construction Grammar to account for the felicity of imperatives in complex sentences. The model of description explains explicitly a wide range of phenomena, including frequency of use, prototypical vs. non-prototypical uses of the English imperative and the choice between longer vs. shorter directives including the imperative. *A Cognitive Linguistic Analysis of the English Imperative: With Special Reference to Japanese Imperatives* is intended for both researchers and students interested in the English imperative and Directive Speech Acts at large and for the linguists working within the Cognitive Linguistics and/or Construction Grammar approach.

Ontolinguistics Andrea C. Schalley 2007-01-01 Current progress in linguistic theorizing is more and more informed by cross-linguistic (including cross-modal) investigation. Comparison of languages relies crucially on the concepts that can be coded with similar effort in all languages. These concepts are part of every language user's ontology, the network of cross-connected conceptualizations the mind uses in coping with the world. Assuming that language comparability is rooted in the comparability of user ontologies, the idea of the present volume is to further instigate progress in linguistics by looking behind the interface with the conceptual-intentional system and asking a still underexplored question: How are ontological structures reflected in intra- and cross-linguistic regularities? This question defines the research program of ontology based linguistics or ontolinguistics. Recent advances in the theory of language have been characterized by an emphasis on external explanatory adequacy and thus on relating language to other phenomena. The research program introduced in this volume adds a decisively distinct and fresh aspect to this emerging new contextualization of the field by bringing together insights from different areas, mainly linguistics, but also neuroscience, philosophy, and artificial intelligence. In providing these disciplines with a new common task, the exploration of the impact of ontological structures on linguistic regularities, the ontolinguistic approach promises to develop into a vital branch of cognitive science. Documenting the beginnings, the book aims to instigate future interdisciplinary research in this area. It will be of interest to researchers in linguistics, artificial intelligence, philosophy, and cognitive science in general.

The Grammar of Identity Stephen Clingman 2009-01-08 In our current world, questions of the transnational, location, land, and identity confront us with a particular insistence. The Grammar of Identity is a lively and wide-ranging study of twentieth-century fiction that examines how writers across nearly a hundred years have confronted these issues. Circumventing the divisions of conventional categories, the book examines writers from both the colonial and postcolonial, the modern and postmodern eras, putting together writers who might not normally inhabit the same critical space: Joseph Conrad, Caryl Phillips, Salman Rushdie, Charlotte Brontë, Jean Rhys, Anne Michaels, W. G. Sebald, Nadine Gordimer, and J. M. Coetzee. In this guise, the book itself becomes a journey of discovery, exploring the transnational not so much as a literal crossing of boundaries but as a way of being and seeing. In fictional terms this also means that it concerns a set of related forms: ways of approaching time and space; constructions of the self by way of combination and constellation; versions of navigation that at once have to do with the foundations of language as well as our pathways through the world. From Conrad's waterways of the earth, to Sebald's endless horizons of connection and accountability, to Gordimer's and Coetzee's meditations on the key sites of village, Empire, and desert, the book recovers the centrality of fiction to our understanding of the world. At the heart of it all is the grammar of identity, how we assemble and undertake our versions of self at the core of our forms of being and seeing.

Transnational Literature Paul Jay 2021-03-19 Transnational Literature: The Basics provides an indispensable overview of this important new field of study and the literature it explores. It concisely describes the various ways in which literature can be understood as being "transnational," explains why scholars in literary studies have become so interested in the topic, and discusses the economic, political, social, and cultural forces that have shaped its development. The book explores a range of contemporary critical approaches to the subject, highlighting how topics like globalization, cosmopolitanism, diaspora, history, identity, migration, and decolonization are treated by both scholars in the field and the writers they study. The literary works discussed range across the globe and include fiction, poetry, and drama by writers including Jhumpa Lahiri, Chimamanda Ngozi Adichie, Jenny Erpenbeck, Aleksandar Hemon, Viet Thanh Nguyen, Derek Walcott, Louise Bennett, Xiaolu Guo, Sally Wen Mao, Wole Soyinka, and many more. This survey stresses the range and breadth—but also the intersecting interests—of transnational writing, engaging the variety of subjects it covers and emphasizing the range of literary devices (linguistic, formal, narrative, poetic, and dramatic) it employs. Highlighting the subjects and issues that have become central to fiction in the age of globalization, Transnational Literature: The Basics is an essential read for anyone approaching study of this vibrant area.

Research Skills for Teachers 1e Beverley Moriarty 2020-03-05 Understanding research principles and developing a small-scale research project is increasingly required of both pre-service and in-service teachers at early childhood, primary and secondary levels. In Research Skills for Teachers, Beverley Moriarty provides an accessible guide to every aspect of education research appropriate to the needs of the beginner. The book helps readers identify their area of research interest and then focus their topic into something manageable yet original and sustainable. There are comprehensive, readable explanations of key concepts and technical terms, and realistic examples throughout show how ideas can be put into action. The text adopts an iterative approach, encouraging readers to revisit research questions, research design and methodology as they progress through the stages of

planning and execution. The book provides clear guidance on core issues including:

- Understanding and completing a literature review
- Quantitative and qualitative approaches
- Developing interviews and surveys
- Analysing data
- Ethical issues and dilemmas

Featuring an accessible, step-by-step approach and rich with case studies and exercises, this is an essential tool for anyone embarking on a career in teaching.

Literary Aesthetics Alan Singer 2001-01-02 It is one of the ironies of contemporary literary study that as it has moved toward greater interdisciplinarity it has grown sceptical of the aesthetic. This anthology works to reassert the continuing relevance of the aesthetic and to reintegrate it into the widening repertoire of contemporary literary critical practices.

Global Civilization in the 21st Century Andrew Targowski 2016-09-01 The purpose of this book is to evaluate the question: What does the New World Order (NWO) mean in the 21st century? After the Polish Revolution in 1989 and the fall of the Berlin Wall in 1989 and the Soviet Union in 1991, many people expected better times than those during the Cold War between the West and East. Since Communism lost to Capitalism, can the latter promote freedom and happiness for all of us everywhere? However, this dream did not happen, vice versa we face now so called liquid times, times of instability and chaos. Therefore, this book is written for those who would like to know why the supposedly ideal economic solution known as Capitalism cannot bring happiness to all of us as it is promised by its promoters. This means that the book should be interesting for all kinds of readers and could be potentially read by millions. The book discusses Hegelian dialectics under the form of competition among ideas that have been neglected in the NOW-21st century and unopposed Capitalism has been transformed into Turbo-Capitalism, also known as Undemocratic Capitalism. This process is supported by additive waves of globalisation taking place in the last 500+ years. Eventually in the 21st century humanity is facing the resulted transformation of western civilization into global civilisation. The book analyses this transformational process and its positive and negative repercussions for humanity.

Walking the Lake District Fells - Keswick Mark Richards 2020-11-24 This guide describes ascents of 30 Lake District fells that can be climbed from Keswick, the Whinlatter Pass, Bassenthwaite, Hesketh Newmarket, Mungrisdale and Threlkeld. The giants of the region Skiddaw and Blencathra need little introduction, their myriad routes attracting many a visitor and promising fantastic far-reaching views. The summits to the north, however, are less frequented, offering probably the closest experience to wilderness walking the Lakes has to offer, whereas to the west, the Whinlatter group present a sylvan alternative. Unlike other guidebooks which describe a single or limited number of routes to a particular destination, the aim of the Walking the Lake District Fells series is to offer all the options. These are presented as numbered sections which can be combined to create infinite possibilities - from simple ascents to longer ridge routes. You'll find the classics and popular routes alongside less traditional alternatives perfect for the wandering spirit. The series gives you both the freedom to devise your own

routes and the information to make informed decisions, thanks to the clear descriptions of the routes, terrain, hazards, interesting features and safe descent paths should the weather close in. Also included are a handful of classic ridge routes for longer fell days. Mark Richards' inimitable text is complemented by HARVEY mapping and the author's own beautiful sketch topos and panoramas. Perfect for keen hillwalkers and peak-baggers alike and ideal both for pre-planning and use on the hill, *Walking the Lake District Fells* is the new incarnation of the Fellranger series, which sees the volumes updated and trimmed to a more practical size. These true connoisseurs' guides are sure to inspire you to get out and explore the beautiful fells of Lakeland. For those collecting fell summits, a 'Fellrangers' hill list register can be found on the Long Distance Walkers Association website.

Open City Teju Cole 2011-08-04 'The past, if there is such a thing, is mostly empty space, great expanses of nothing, in which significant persons and events float. Nigeria was like that for me: mostly forgotten, except for those few things that I remembered with outsize intensity.' Along the streets of Manhattan, a young Nigerian doctor doing his residency wanders aimlessly. The walks meet a need for Julius: they are a release from the tightly regulated mental environment of work, and they give him the opportunity to process his relationships, his recent breakup with his girlfriend, his present, his past. Though he is navigating the busy parts of town, the impression of countless faces does nothing to assuage his feelings of isolation. But it is not only a physical landscape he covers; Julius crisscrosses social territory as well, encountering people from different cultures and classes who will provide insight on his journey-which takes him to Brussels, to the Nigeria of his youth, and into the most unrecognizable facets of his own soul. A haunting novel about national identity, race, liberty, loss, dislocation, and surrender, Teju Cole's *Open City* seethes with intelligence. Written in a clear, rhythmic voice that lingers, this book is a mature, profound work by an important new author who has much to say about our world.

Patterns of Modernity: The West Shmuel Noah Eisenstadt 1987

Current Trends in Psychology Wayne Dennis 1947 "During World War II every psychologist had a job to do. His contributions sometimes were made in uniform and sometimes in whatever vestless and cuffless suit was available. Whether in uniform or not, the psychologist's work was related to the war effort or to the essential war functions of the nation. When the war ended, the psychologist found that his responsibilities were no less urgent. For the future his prospects seem to be even heavier burdens and a neverending path. Since the years 1940 and 1941, the psychologist has shown himself capable of performing duties not previously allotted to him, or, for that matter, not previously delegated to anyone else. There has grown up a better understanding of the potential functions of the psychologist, an understanding which creates new assignments for him. Instead of a reluctance to intrust to him problems in human behavior, there is today an insistence that he attempt problems with which perhaps he is not yet prepared to deal. Clearly these past few years have been an era of great change in psychology, as they have in many other fields. It is unfortunate that during these dramatic and eventful times, there were few professional meetings and little time or opportunity for the discussion of professional problems. With the return of the possibility of holding professional meetings, it occurred to us that a symposium on current trends in psychology would be most timely and desirable. With the cordial support of the administrative officials of the University, we were able to hold at the University of Pittsburgh, on March 5 and 6, 1947, a conference on

current trends in psychology. The present volume contains the papers delivered then. In planning our program we attempted to include in it discussions of recent advances and of probable future developments in several fields of psychology. There necessarily was a limit to the number of fields which could be included. In each chosen area of psychology we selected a speaker who is now active in that field"--Preface. Christian Fiction and Religious Realism in the Novels of Dostoevsky Wil van den Bercken 2011-01-01 This study offers a literary analysis and theological evaluation of the Christian themes in the five great novels of Dostoevsky - 'Crime and Punishment', 'The Idiot', 'The Adolescent', 'The Devils' and 'The Brothers Karamazov'. Dostoevsky's ambiguous treatment of religious issues in his literary works strongly differs from the slavophile Orthodoxy of his journalistic writings. In the novels Dostoevsky deals with Christian basic values, which are presented via a unique tension between the fictionality of the Christian characters and the readers' experience of the existential reality of their religious problems.

The Routledge Handbook of Literary Translingualism Steven G. Kellman 2021-09-30 Though it might seem as modern as Samuel Beckett, Joseph Conrad, and Vladimir Nabokov, translingual writing - texts by authors using more than one language or a language other than their primary one - has an ancient pedigree. The Routledge Handbook of Literary Translingualism aims to provide a comprehensive overview of translingual literature in a wide variety of languages throughout the world, from ancient to modern times. The volume includes sections on: translingual genres - with chapters on memoir, poetry, fiction, drama, and cinema ancient, medieval, and modern translingualism global perspectives - chapters overseeing European, African, and Asian languages. Combining chapters from lead specialists in the field, this volume will be of interest to scholars, graduate students, and advanced undergraduates interested in investigating the vibrant area of translingual literature. Attracting scholars from a variety of disciplines, this interdisciplinary and pioneering Handbook will advance current scholarship of the permutations of languages among authors throughout time.

Intonation and Meaning Daniel Buring 2016-09-21 This volume provides a guide to what we know about the interplay between prosody-stress, phrasing, and melody-and interpretation-felicity in discourse, inferences, and emphasis. Speakers can modulate the meaning and effects of their utterances by changing the location of stress or of pauses, and by choosing the melody of their sentences. Although these factors often do not change the literal meaning of what is said, linguists have in recent years found tools and models to describe these more elusive aspects of linguistic meaning. This volume provides a guide to what we know about the interplay between prosody-stress, phrasing, and melody-and interpretation-felicity in discourse, inferences, and emphasis. Daniel Buring presents the main phenomena involved, and introduces the details of current formal analyses of prosodic structure, relevant aspects of discourse structure, intonational meaning, and, most importantly, the relations between them. He explains and compares the most

influential theories in these areas, and outlines the questions that remain open for future research. This wide-ranging book involves aspects of phonetics, phonology, syntax, semantics, and pragmatics, and will be of interest to researchers and students in all of these fields, from advanced undergraduate level upwards.

Dostoevsky and The Idea of Russianness Sarah Hudspith 2004-03-01 This book examines Dostoevsky's interest in, and engagement with, "Slavophilism" - a Russian mid-nineteenth century movement of conservative nationalist thought. It explores Dostoevsky's views, as expressed in both his non-fiction and fiction, on the religious, spiritual and moral ideas which he considered to be innately Russian. It concludes that Dostoevsky is an important successor to the Slavophiles, in that he developed their ideas in a more coherent fashion, broadening their moral and spiritual concerns into a more universal message about the true worth of Russia and her people.

Loving Che Ana Menendez 2007-12-01 In this "evocative first novel," an elderly woman looks back on the world of revolutionary Cuba as she recalls her intimate, secret love affair with Ernesto "Che" Guevara (Publishers Weekly). A young Cuban woman has been searching in vain for details of her birth mother. All she knows of her past is that her grandfather fled the turbulent Havana of the 1960s for Miami with her in tow, and that pinned to her sweater-possibly by her mother-were a few treasured lines of a Pablo Neruda poem. These facts remain her only tenuous links to her history, until a mysterious parcel arrives in the mail. Inside the soft, worn box are layers of writings and photographs. Fitting these pieces together

with insights she gleans from several trips back to Havana, the daughter reconstructs a life of her mother, her youthful affair with the dashing, charismatic Che Guevara and the child she bore by the enigmatic rebel. *Loving Che* is a brilliant recapturing of revolutionary Cuba, the changing social mores, the hopes and disappointments, the excitement and terror of the times. It is also an erotic fantasy, a glimpse into the private life of a mythic public figure, and an exquisitely crafted meditation on memory, history, and storytelling. Finally, *Loving Che* is a triumphant unveiling of how the stories we tell about others ultimately become the story of ourselves. "A moving novel from a writer to watch." -Publishers Weekly "Inventive and hypnotic . . . [An] artful and restless examination of the exile soul." -Los Angeles Times "[Menendez] captures Cuba's potential, its desperation and decay, and also its dark humor." -The New York Times "The writing is consistently beautiful. Highly recommended." -Library Journal

Iconicity Masako K. Hiraga 2015-02-15 *Iconicity: East Meets West* presents an intersection of East-West scholarship on Iconicity. Several of its chapters thus deal with Asian languages and cultures, or a comparison of world languages. Divided into four categories: general issues; sound symbolism and mimetics; iconicity in literary texts; and iconic motivation in grammar, the chapters show the diversity and dynamics of iconicity research, ranging from iconicity as a driving force in language structure and change, to the various uses of images, diagrams and metaphors at all levels of the literary text, in both narrative and poetic forms, as well as on all varieties of discourse, including the visual and the oral.

The Language of Emotions ... Niemeier-Dirven 1997-01-01 Since the celebration of the 100th anniversary of Darwin's *The Language of the Emotions in Man and Animals* (1872), emotionology has become a respectable and even thriving research domain again. The domain of human emotions is most important for mankind, emotions being right in the center of our daily lives and interests. A key-role in the interdisciplinary scientific debate about emotions has now been accorded to the study of the language of emotions. The present volume offers a new approach to the study of the language of emotions insofar as it presents theories from very different perspectives. It encompasses studies by scholars from diverse disciplines such as linguistics, sociology, and psychology. The topics of the contributions also cover a range of special fields of interest in four major sections. In a first section, a discussion of theoretical issues in the analysis of emotions is presented. The conceptualization of emotions in specific cultures is analyzed in section 2. Section 3 takes a different inroad into the language of emotions by looking at developmental approaches giving evidence of the fact that the acquisition of the language of emotions is a social achievement that simultaneously determines our experience of these emotions. Section 4 is devoted to emotional language in action, that is, the contributions focus upon different types of texts and analyze how emotions are referred to and expressed in discourse.

Amy Beach, Passionate Victorian Adrienne Fried Block 2000-01-15 "Block's fastidious research, together with her sympathetic mastery of the issues involved in writing a life, have yielded a lively portrait of this important musician and intriguing personality. The book is especially rich in its exploration of Beach's origins in family, community, and region, and in its ability to put her life experience into the context of America's changing cultural life."--Ruth A. Solie, Smith College

Early Language Learning and Teacher Education Subhan Zein 2019-02-26 Language teacher education is widely identified as one of the most important areas that needs addressing in order to improve early language instruction, yet research into teacher education for early language teachers remains relatively sparse. This volume responds to this gap by compiling studies with diverse methodological tenets from a wide range of geographical and educational contexts around the world. The volume aims to enhance understanding of early language teacher education as well as to address the need to prepare early language teachers and assist them in their professional development. The chapters focus on the complexity of teacher learning, innovations in mentoring and teacher supervision, strategies in programme development and perceptions, and knowledge and assessment in early language learning teacher education. The volume offers comprehensive coverage of the field by addressing various aspects of teacher education in different languages. The contributions highlight examples of research into current practice in the professional enhancement of early language learning teachers, but with an emphasis on the implications for practitioners.

Interpreting Imperatives Magdalena Kaufmann 2011-10-26 Imperative clauses are recognized as one of the major clause types alongside those known as declarative and interrogative. Nevertheless, they are still an enigma in the study of meaning, which relies largely on either the concept of truth conditions or the concept of information growth—neither of which are easily applied to imperatives. This book puts forward a fresh perspective. It analyzes imperatives in terms of modalized propositions, and identifies an additional, presuppositional, meaning component that makes an assertive interpretation inappropriate. The author shows how these

two elements can help explain the varied effects imperatives have, depending on their usage context. Imperatives have been viewed as elusive components of language because they have a range of functions that makes them difficult to unify theoretically. This fresh view of the semantics-pragmatics interface allows for a uniform semantic analysis while accounting for the pragmatic versatility of imperatives.

Mind Design II John Haugeland 1997-03-06 Mind design is the endeavor to understand mind (thinking, intellect) in terms of its design (how it is built, how it works). Unlike traditional empirical psychology, it is more oriented toward the "how" than the "what." An experiment in mind design is more likely to be an attempt to build something and make it work—as in artificial intelligence—than to observe or analyze what already exists. Mind design is psychology by reverse engineering. When Mind Design was first published in 1981, it became a classic in the then-nascent fields of cognitive science and AI. This second edition retains four landmark essays from the first, adding to them one earlier milestone (Turing's "Computing Machinery and Intelligence") and eleven more recent articles about connectionism, dynamical systems, and symbolic versus nonsymbolic models. The contributors are divided about evenly between philosophers and scientists. Yet all are "philosophical" in that they address fundamental issues and concepts; and all are "scientific" in that they are technically sophisticated and concerned with concrete empirical research. Contributors Rodney A. Brooks, Paul M. Churchland, Andy Clark, Daniel C. Dennett, Hubert L. Dreyfus, Jerry A. Fodor, Joseph Garon, John Haugeland, Marvin Minsky, Allen Newell, Zenon W.
