**The Prediction of Achievement and Creativity** Raymond Bernard Cattell 1968

*ECJ--recent Developments in Direct Taxation* Michael Lang 2006-01-01 A growing number of cases pending before the European Court of Justice (ECJ) concern the fundamental freedoms and direct taxation. This book scrutinises the national background of the most important of these cases and examines possible infringements of fundamental freedoms. The focus of each analysis is on the questions submitted to the ECJ by the national courts. Moreover, where available, the opinion of the Advocate General is discussed. The cases are presented by esteemed national and European tax law experts. This book goes to the heart of the national tax systems, exposing hidden obstacles to fundamental freedoms.

**Middle Eastern Christians and Europe** Andreas Schmoller 2018-04 Middle Eastern Christians have a long tradition of interacting with Europe. As other minorities they have also "emerged" through relations of European powers with the region. The historical circulation of people and ideas is also relevant for identities of Middle Eastern Christians who have settled in Europe in the past decades. This volume, stemming from an interdisciplinary workshop in Salzburg 2016, brings together both perspectives of entanglement.

*Space, Culture, and the Youth in Iran* Behnoosh Payvar 2016-04-29 This book analyzes the Artists' House, a cultural center in Tehran, to place Iran's social and cultural transformation in a local-global context. The text addresses the interaction of Iranian youth with technology and mass communications, law, tradition, and contemporary questions concerning body, identity, and lifestyle.

*Russian-Jewish Literature and Identity* Alice S. Nakhimovsky 1992 Ch. 1 (pp. 1-44), "Enlightenment, Disappearance, Reemergence", traces the history of Russian Jews after the Revolution, pointing out the Stalinist antisemitic campaign and the reemergence of popular and intellectual antisemitism in the "perestroika" years (e.g. I. Shafarevich). The following chapters, on Russian Jewish writers, deal also with the effect of the Holocaust and Stalin's anti-Jewish purge on the works of Vasilii Grossman and Aleksandr Galich (pseudonym of Aleksandr A. Ginzburg). Mentions expressions of Jewish self-hatred in other writers' works.

*Neither With Them, Nor Without Them* Elena M. Katz 2008-05-02 The debates over the Jewish theme in Russian

literature have been long dominated by the old dichotomy between anti and philo-Semitic discourses. Rather than analyzing "the image of the Jew" in terms of negative or positive characteristics, and branding the authors respectively, as anti- or philo-Semitic, the author explores the complexity and the ambiguity of the construction of Jewishness as the "Other" in the works of three of Russia's greatest nineteenth-century authors. Katz identifies Gogol, Dostoevsky and Turgenev as creators of special modes of the emerging Jewish discourse in Russian literature. She tackles the traditionally read tropes of Jews in light of both sociohistoric and cultural contexts of the time and the writers' own politics and aesthetics.

**Migration, Migration History, History** Jan Lucassen 2005-01 During the last decade studies have indicated that migration has been a normal, structural element of human societies throughout history. Progress in migration and settlement studies under this new paradigm has been so substantial that a new state of the art is needed. This book presents a reconsideration of current theoretical perspectives encompassing enlightened insights in diverging specialisms in the field of migration history, such as slavery studies, ethnic history, macro-economic migration studies, and gypsy studies. The seventeen essays in this volume, written by leading scholars in the field, collectively represent a pioneering effort in migration and settlement studies. They address the problems of ongoing specialization (and hence the need for synthesis) and the difficulties of integrating the consequences of this new paradigm into general histories.

**Mediation** Klaus J. Hopt 2018-12-13 Mediation provides an attractive alternative to resolving disputes through court proceedings. Mediation promises just results in the interest of all parties concerned, a reduction of the court caseload, and cost savings for the parties involved as well as for the treasury. The European Directive on Mediation has given mediation in Europe new momentum by establishing a common framework for cross-border mediation. Beyond Europe, many states have tried in recent years to answer the question whether, and if so, how mediation should be regulated at a national and international level. The aim of this book is to promote

the understanding and discussion of regulatory issues by presenting comparative research on mediation. It describes and analyses the law and practice of mediation in twenty-two countries. Europe is represented by chapters on mediation in Austria, Bulgaria, England, France, Germany, Greece, Hungary, Ireland, Italy, the Netherlands, Norway, Poland, Portugal and Spain. The world beyond Europe is analysed in chapters on mediation in Australia, Canada, China, Japan, New Zealand, Russia, Switzerland and the USA. Against this background, further chapters on fundamental issues identify possible regulatory models and discuss central principles of mediation law and practice. In particular, the work considers harmonisation and diversity in the law of mediation as well as the economic and constitutional problems associated with privatising civil justice. To the extent available, empirical research is used as a point of reference in the critical analysis.

**Attachment Theory** Susan Goldberg 2013-04-15 At a historic conference in Toronto in October 1993, developmental researchers and clinicians came together for the first time to explore the implications of current knowledge of attachment. This volume is the outcome of their labors. It offers innovative approaches to the understanding of such diverse clinical topics as child abuse, borderline personality disorder, dissociation, adolescent suicide, treatment responsiveness, false memory, narrative competence, and the intergenerational transmission of trauma.

*Florian Znaniecki's Sociological Theory and the Challenges of 21st Century* Elżbieta Hałas 2000 The volume includes texts by sociologists from the USA, Great Britain, Germany, Italy, Australia and Poland, all of whom deemed Florian Znaniecki's ideas worth discussing in the context of the condition of contemporary sociology and society at the turning point of this era. Znaniecki (1882-1958), an eminent Polish and American sociologist and philosopher of culture, conducted research into the possibility of developing social solidarity on a global scale. Znaniecki pioneered new ideas in the field of the sociology of nation and in the theory of the global society. The main issue for Znaniecki was the possibility of creating inter-cultural communication leading to a peaceful order. All texts present creative pursuit of his ideas. They bring into focus the theoretical and practical challenges offered both to the departing and to the new generation entering life now, at the dawn of the twenty-first century.

**Beyond the Pale** Benjamin Nathans 2002 A surprising number of Jews lived, literally and figuratively, 'beyond the Pale' of Jewish Settlement in tsarist Russia during the half-century before the Revolution of 1917. This text reinterprets the history of the Russian-Jewish encounter, using long-closed Russian archives and other sources.

*Seeing the Insane* Sander L. Gilman 1982 Seeing the Insane is a richly detailed cultural history of madness and art in the Western world, showing how the portrayal of stereotypes has both reflected and shaped the perception and treatment of the mentally disturbed.

*Antisemitism in the North* Jonathan Adams 2019-12-02 Is research on antisemitism even necessary in countries with a relatively small Jewish population? Absolutely, as this volume shows. Compared to other countries, research on antisemitism in the Nordic countries (Denmark, the Faroe Islands, Finland, Greenland, Iceland, Norway, and Sweden) is marginalized at an institutional and staffing level, especially as far as antisemitism beyond German fascism, the Second World War, and the Holocaust is concerned. Furthermore, compared to scholarship on other prejudices and minority groups, issues concerning Jews and anti-Jewish stereotypes remain relatively underresearched in Scandinavia – even though antisemitic stereotypes have been present and flourishing in the North ever since the

arrival of Christianity, and long before the arrival of the first Jewish communities. This volume aims to help bring the study of antisemitism to the fore, from the medieval period to the present day. Contributors from all the Nordic countries describe the status of as well as the challenges and desiderata for the study of antisemitism in their respective countries.

**Unheroic Conduct** Daniel Boyarin 1997-06-13 In a book that will both enlighten and provoke, Daniel Boyarin offers an alternative to the prevailing Euroamerican warrior/patriarch model of masculinity and recovers the Jewish ideal of the gentle, receptive male. The Western notion of the aggressive, sexually dominant male and the passive female reaches back through Freud to Roman times, but as Boyarin makes clear, such gender roles are not universal. Analyzing ancient and modern texts, he reveals early rabbis—studious, family-oriented—as exemplars of manhood and the prime objects of female desire in traditional Jewish society. Challenging those who view the "feminized Jew" as a pathological product of the Diaspora or a figment of anti-Semitic imagination, Boyarin argues that the Diaspora produced valuable alternatives to the dominant cultures' overriding gender norms. He finds the origins of the rabbinic model of masculinity in the Talmud, and though unrelentingly critical of rabbinic society's oppressive aspects, he shows how it could provide greater happiness for women than the passive gentility required by bourgeois European standards. Boyarin also analyzes the self-transformation of three iconic Viennese modern Jews: Sigmund Freud, the father of psychoanalysis; Theodor Herzl, the founder of Zionism; and Bertha Pappenheim (Anna O.), the first psychoanalytic patient and founder of Jewish feminism in Germany. Pappenheim is Boyarin's hero: it is she who provides him with a model for a militant feminist, anti-homophobic transformation of Orthodox Jewish society today. Like his groundbreaking *Carnal Israel*, this book is talmudic scholarship in a whole new light, with a vitality that will command attention from readers in feminist studies, history of sexuality, Jewish culture, and the history of psychoanalysis.

**The Artless Jew** Kalman P. Bland 2001-07-02 Conventional wisdom holds that Judaism is indifferent or even suspiciously hostile to the visual arts due to the Second Commandment's prohibition on creating "graven images," the dictates of monotheism, and historical happenstance. This intellectual history of medieval and modern Jewish attitudes toward art and representation overturns the modern assumption of Jewish iconophobia that denies to Jewish culture a visual dimension. Kalman Bland synthesizes evidence from medieval Jewish philosophy, mysticism, poetry, biblical commentaries, travelogues, and law, concluding that premodern Jewish intellectuals held a positive, liberal understanding of the Second Commandment and did, in fact, articulate a certain Jewish aesthetic. He draws on this insight to consider modern ideas of Jewish art, revealing how they are inextricably linked to diverse notions about modern Jewish identity that are themselves entwined with arguments over Zionism, integration, and anti-Semitism. Through its use of the past to illuminate the present and its analysis of how the present informs our readings of the past, this book establishes a new assessment of Jewish aesthetic theory rooted in historical analysis. Authoritative and original in its identification of authentic Jewish traditions of painting, sculpture, and architecture, this volume will ripple the waters of several disciplines, including Jewish studies, art history, medieval and modern history, and philosophy.

*The Myth of the Jewish Race* Raphael Patai 1989 In this carefully researched analysis, Raphael and Jennifer Patai begin by defining race. They then develop the idea of the existence of "races" through history. In rich and fascinating detail, the authors consider the effects of

intermarriage, interbreeding, proselytism, slavery, and concubinage on the Jewish population from Biblical times to the present. New material explores the psychological aspects of the Jewish race issue, the Jewish psyche, and the consequences of the 1975 United Nations resolution equating Zionism with racism. A revised and updated scientific section on the measurable genetic, morphological, and behavioral differences between Jews and non-Jews supports the conclusion that the idea of a "Jewish race" is, indeed, a myth.

*A Continent Moving West?* Richard Black 2010 Dit boek beschrijft de toename van migratie uit Oost-europese landen in de periode van 2004-2007, na toetreding tot de EU. Het bevat nieuwe empirische 'casestudies' van migratiepatronen, zowel gebaseerd op veldwerk als op de analyse van bestaande statistieken.

**Family Justice Review** Family Justice Review 2011-11-28 The Family Justice Review examines the effectiveness of the family justice system and the outcomes it delivers. The review covers both public and private law cases; explores if better use can be made of mediation and how best to support contact between children and non-resident parents or grandparents; examines the processes (but not the law) involved in granting divorces and awarding ancillary relief, and looks at how the different parts of the family justice system are organised and managed. The review is aiming to produce a system which allows families to reach easy, simple and efficient agreements which are in the best interests of children whilst protecting children and vulnerable adults from risk of harm. The agencies and professionals directly involved in the family justice system are all in scope for the Review. This final report takes into account views expressed during the consultation on the interim report and the call for evidence. It makes a number of recommendations to improve public and private law and looks at how the agencies within the family justice system could work together more effectively to improve the experience for children and families

**Attachment Issues in Psychopathology and Intervention** Leslie Atkinson 2003-12-08 To be a human being (or indeed to be a primate) is to be attached to other fellow beings in relationships, from infancy on. This book examines what happens when the mechanisms of early attachment go awry, when caregiver and child do not form a relationship in which the child finds security in times of uncertainty and stress. Although John Bowlby, a psychiatrist and psychoanalyst, originally formulated attachment theory for the express purpose of understanding psychopathology across the life span, the concept of attachment was first adopted by psychologists studying typical development. In recent years, clinicians have rediscovered the potential of attachment theory to help them understand psychological/psychiatric disturbance, a potential that has now been amplified by decades of research on typical development. *Attachment Issues in Psychopathology and Intervention* is the first book to offer a comprehensive overview of the implications of current attachment research and theory for conceptualizing psychopathology and planning effective intervention efforts. It usefully integrates attachment considerations into other frameworks within which psychopathology has been described and points new directions for investigation. The contributors, who include some of the major architects of attachment theory, link what we have learned about attachment to difficulties across the life span, such as failure to thrive, social withdrawal, aggression, anxiety, depression, bipolar disorder, dissociation, trauma, schizo-affective disorder, narcissistic personality disorder, eating disorders, and comorbid disorders. While all chapters are illuminated by rich case examples and discuss intervention at length, half focus solely on interventions informed by attachment theory, such as toddler-parent psychotherapy and emotionally focused

couples therapy. Mental health professionals and researchers alike will find much in this book to stimulate and facilitate effective new approaches to their work.

*Rebuilding Community Connections - Mediation and Restorative Justice in Europe* Ivo Aertsen 2004-01-01 *Rebuilding community connections* outlines the main features of restorative justice, including different models and research findings, and proposes guidelines for setting up programmes. It also identifies problems and ways of dealing with them. This guide provides essential information for those planning to introduce restorative justice, in particular countries in central and eastern Europe. For countries that have already done so, it offers an opportunity to review practice in the light of experience and research elsewhere. -- Council of Europe.

*Circulation in Third World Countries* R Mansell Prothero 2012-06-25 *Circulation* is common in Third World countries and involves reciprocal flows of people, goods and ideas. The essays in this volume, first published in 1985, discuss concepts associated with circulation in its various forms, and they present empirical evidence based on field work from holistic, ecological, social, and economic points of view. Contributions from Latin America, the Caribbean, Africa, Asia and the Pacific come from an international group of authors representing a variety of disciplines in the social sciences. All who are concerned with social and economic development need to recognise the importance of circulation at all levels of society and polity.

*Economy of Pompeii* Andrew Wilson 2016-12-22 This volume presents fourteen papers by Roman archaeologists and historians discussing approaches to the economic history of Pompeii, and the role of the Pompeian evidence in debates about the Roman economy. Four themes are discussed. The first of these is the position of Pompeii and its agricultural environment, discussing the productivity and specialization of agriculture in the Vesuvian region, and the degree to which we can explain Pompeii's size and wealth on the basis of the city's economic hinterland. A second issue discussed is what Pompeians got out of their economy: how well-off were people in Pompeii? This involves discussing the consumption of everyday consumer goods, analyzing archaeobotanical remains to highlight the quality of Pompeian diets, and discussing what bone remains reveal about the health of the inhabitants of Pompeii. A third theme is economic life in the city: how are we to understand the evidence for crafts and manufacturing? How are we to assess Pompeii's commercial topography? Who were the people who actually invested in constructing shops and workshops? In which economic contexts were Pompeian paintings produced? Finally, the volume discusses money and business: how integrated was Pompeii into the wider world of commerce and exchange, and what can the many coins found at Pompeii tell us about this? What do the wax tablets found near Pompeii tell us about trade in the Bay of Naples in the first century AD? Together, the chapters of this volume highlight how Pompeii became a very rich community, and how it profited from its position in the centre of the Roman world.

**Clinics in Developmental Medicine** 1964

**New Directions in Urban-Rural Migration** David L. Brown 2013-10-02 *New Directions in Urban-Rural Migration: The Population Turnaround in Rural America* covers a wide-ranging treatment of urban-rural migration and population growth in contemporary America. The book discusses the national and regional changes in internal migration and population distribution; the regional diversity and complexity of economic structure in modern-day rural America; and the reasons for the gap, or lag, between changed conditions and unchanged policy. The text also describes the turnaround's implications

for new models of migration; the economic framework for the turnaround; and the traditional concept of the migrant as labor and the structural conditions within and between areas that fix the demand for labor. Migration trends and consequences in rapidly growing areas, as well as data resources for population distribution research are also considered. Sociologists and people involved in studying migration will find the book invaluable.

*Measuring and Accounting for Innovation in the Twenty-First Century* Carol Corrado 2021-05-18 Measuring innovation is a challenging task, both for researchers and for national statisticians, and it is increasingly important in light of the ongoing digital revolution. National accounts and many other economic statistics were designed before the emergence of the digital economy and the growth in importance of intangible capital. They do not yet fully capture the wide range of innovative activity that is observed in modern economies. This volume examines how to measure innovation, track its effects on economic activity and on prices, and understand how it has changed the structure of production processes, labor markets, and organizational form and operation in business. The contributors explore new approaches to and data sources for measurement, such as collecting data for a particular innovation as opposed to a firm and using trademarks for tracking innovation. They also consider the connections between university-based R&D and business start-ups and the potential impacts of innovation on income distribution. The research suggests strategies for expanding current measurement frameworks to better capture innovative activity, including developing more detailed tracking of global value chains to identify innovation across time and space and expanding the measurement of innovation's impacts on GDP in fields such as consumer content delivery and cloud computing.

Russia Gathers Her Jews John Klier 2011 Seeks to revise the traditional view of Russian Jewish historiographers that religious intolerance, xenophobia, and belief in a Jewish economic threat motivated imperial policy towards the Jews after the partition of Poland. Emphasizes the influence of Western reform tradition on the formation of that policy. Surveys, also, the Jews' legal status in Poland and Polish religious and economic antisemitism.

Professional Education: Some New Directions Sloan Fellows Professor of Management Edgar H Schein 1972

The Intuitive Practitioner Terry Atkinson 2000 This volume investigates, both conceptually and empirically, the role of intuition in professional practice and its significance for professional development, especially within the world of education. The relationship between rationale or explicit ways of knowing and learning and inarticulate, intuitive or implicit ones is explored in the context of professional practice and development. The tendency to interpret reflection solely in terms of articulation is questioned and the value of other forms of reflection is reasserted. The working relationship between reason and intuition is illustrated in a variety of case studies in distinctive educational and professional settings. From this reassessment of intuition, practical lessons for the initial training and continuing professional development of educators and

others are highlighted and extracted.

**The Autobiography of Thomas Platter** Thomas Platter 1839 *Saudi Arabia and Iran* Banafsheh Keynoush 2016-04-08 The mesmerizing story of two countries caught in history whose rivalry can destroy the world or restore its peace, this is the first book to untangle the complex relationship of Saudi Arabia and Iran by rejecting heated rhetoric and looking at the real roots of the issue to promise pathways to peace.

*Lived Citizenship on the Edge of Society* Hanne Warming 2017-07-12 This edited collection presents the concept of lived citizenship as a fruitful avenue for exploring the role played by social work practices in the lives of people in vulnerable positions. The book centres on the everyday experiences through which people practice, negotiate, understand and feel their citizenship. The authors offer both empirical analyses of how social work influences the rights, obligations, identities and belongings of children, homeless people, migrants, ethnic minorities, and young people with mental disabilities; and a theoretical framework for analysing the complexities of social work. Drawing on the notion of intimate citizenship and an understanding of citizenship as socio-spatial, the theoretical framework addresses the challenges of enhancing the agency of social work clients and of promoting inclusive citizenship, and how these challenges are shaped by emotions, affect, rationality, materiality, power relations, policies and managerial strategies. *Lived Citizenship on the Edge of Society* will be of interest to students and scholars across a range of disciplines including social policy and social work.

**Rethinking European Jewish History** Jeremy Cohen 2014-03 Europe has changed greatly in the last century. Political, social, and ideological transformations have not only redrawn the map of the continent but have woven the fabric of its culture. These changes have nourished widespread reassessment in European historical research: in terms of its presuppositions, its methodologies, its directions, its emphasis, and its scope. The political boundaries between nations and states, along with the very concepts of 'nation' and 'boundary,' have changed significantly, and the self-consciousness of ethnic minorities has likewise evolved in new directions. All these developments have affected how the Jews of Europe perceive themselves, and help to shape the prism through which historians view the Jewish past. This book - now available in paperback - looks at the Jewish past in the spirit of this reassessment. Part I reconsiders the basic parameters of the subject, as well as some of its fundamental concepts, suggesting new assumptions and perspectives from which to conduct future studies of European Jewish history. Topics covered here include periodization and the definition of geographical borders, antisemitism, gender and the history of Jewish women, and notions of assimilation. Part II is devoted to articulating the meaning of 'modernity' in the history of European Jewry and demarcating key stages in its crystallization. This section reflects on the defining characteristics of a distinct early modern period in European Jewish history, the Reformation and the Jews, and the fundamental features of the Jewish experience in modern times. Parts III and IV present two scholarly conversations as case studies for the application of the critical and programmatic categories considered thus far: the complex web of relationships between Jews, Christians, and Jewish converts to Christianity (Conversos, New Christians, Marranos) in 15th-century Spain; and the impact of American Jewry on Jewish life in Europe in the 20th century, at a time when the dominant trend was one of migration from Europe to the Americas. This timely volume suggests a new framework for the study of Jewish history and helps to contextualize it within the mainstream of historical scholarship. \*\*\* "The

methodological questions [the contributors] raise have serious implications for the way we understand ourselves as Jews today." - Adam Kirsch, Tablet Magazine

Exemplary Bodies Henrietta Mondry 2009 Mondry explores the construction of the Jews' physical and ontological bodies in Russian culture as represented in literature, film, and nonliterary texts from the 1880s to the present. This stereotype has become a stable archetype that continues to operate in contemporary Russian society.

**Stabilization and Structural Adjustment in Poland** Henryk Kierzkowski 2013-04-15 The Solidarity-led government which came into power in Poland in Autumn 1989 faced two

enormous tasks. First, to stabilize an economy prone to hyperinflation. Second, to replace a crumbling command system in favour of a market mechanism, in a country whose market institutions had been destroyed under forty years of communist rule. This book recounts the events of this period and the course taken by the new government, and analyzes the significance of this for the transition process in Poland and elsewhere.

*Social Work* Marie Connolly 2015-08-25 This second edition includes material on mind, body and spirit social work, mindfulness, and enhanced content on Indigenous social work.
