*Re-Constructing Grassroots Holocaust Memory* Irina Rebrova 2020-10-26 The main objective of the book is to allocate the grass roots initiatives of remembering the Holocaust victims in a particular region of Russia which has a very diverse ethnic structure and little presence of Jews at the same time. It aims to find out how such individual initiatives correspond to the official Russian hero-orientated concept of remembering the Second World war with almost no attention to the memory of war victims, including Holocaust victims. North Caucasus became the last address of thousands of Soviet Jews, both evacuees and locals. While there was almost no attention paid to the Holocaust victims in the official Soviet propaganda in the postwar period, local activists and historians together with the members of Jewish communities preserved Holocaust memory by installing small obelisks at the killing sites, writing novels and making documentaries, teaching about the Holocaust at schools and making small thematic exhibitions in the local and school museums. Individual types of grass roots activities in the region on remembering Holocaust victims are analyzed in each chapter of the book.

**History of Russian Underwater Acoustics** Oleg A. Godin 2008 This book describes, using first-person accounts, the history of the development in the Soviet Union and, later, in Russia of an extremely important technical field and how that history was influenced by WWI, WWII, and the Cold War, by government bureaucracy, in both positive and negative ways, by the economic collapse of the Soviet Union, and most importantly, by the dedicated efforts of vast numbers of individuals, including some of the greatest scientific minds of the 20th century. It will make fascinating reading for engineers and scientists who were engaged in similar work in the West, for historians of the Cold War and of the Soviet Union, and for present day researchers who need to learn about Russian scientific contributions. Because of its importance to national security, much of the research and development effort in underwater acoustics was classified during the Cold War, both in the Soviet Union and the United States. This book presents the first declassified accounts of the development of numerous hydroacoustic systems by individuals having first-hand knowledge of the development efforts.

*Stalinist Cinema and the Production of History* Evgeny Dobrenko 2008-03-05 This book explores how Soviet film worked with time, the past, and memory. It looks at Stalinist cinema and its role in the production of history. Cinema's role in the legitimization of Stalinism and the production of a new Soviet identity was enormous. Both Lenin and Stalin saw in this 'most important of arts' the most effective form of propaganda and 'organisation of the masses'. By examining the works of the greatest Soviet filmmakers of the Stalin era--Sergei Eisenstein, Vsevolod Pudovkin, Grigorii Kozintsev, Leonid Trauberg, Fridrikh Ermler--the author explores the role of the cinema in the formation of the Soviet political imagination.

Ethnicity and Ethnic Conflict in the Post-Communist World B. Fowkes 2002-03-06 Ethnic and national conflicts have been an unexpected and major source of problems in many parts of the world in recent times. Nowhere more so than in the formerly communist countries. This book provides a readable introduction to, and brief analytical coverage of, all the ethnic disputes of the 1990s. Full justice is done both to complex present-day situations and the deeper roots of ethnic conflict. This is followed by a review and evaluation of the main available explanations. The book is required reading for anyone who wants to understand why the fall of communism did not introduce an era of goodwill between the nations.

The Leader Cult in Communist Dictatorships B. Apor 2004-10-09 The first book to analyze the distinct leader cults that flourished in the era of 'High Stalinism' as an integral part of the system of dictatorial rule in the Soviet Union and Eastern Europe. Fifteen studies explore the way in which these cults were established, their function and operation, their dissemination and reception, the place of the cults in art and literature, the exportation of the Stalin cult and its implantment in the communist states of Eastern Europe, and the impact which de-Stalinisation had on these cults.

**Stalin and the Literary Intelligentsia, 1928-39** A. Kemp-Welch 2016-07-27 Stalin's fascination with writers was fully reciprocated as the many 'Odes to Stalin' show. During the 1970s a hugely elaborated system was established for the regulation of belles-lettres based on institutions, ideas and individuals. This original study, ten years in preparation, is based on extensive access to Soviet archives. Much new evidence has been uncovered about the inner workings of cultural policy in the Stalin period and documents by Stalin himself are published for the first time.

**About Russia, Its Revolutions, Its Development and Its Present** Michal Reiman 2016-07-29 "The author analyzes modern Russian history from a new perspective. Due to the ideological heritage of the XIX and XX century, the social settings of the sociopolitical history of the USSR (1917-1945) have not been fully identified. Detailed examination of ideological and political concepts shows that the revolution of 1917 became not a middle class, proletarian movement, but rather a plebeian one. The misjudgment by the new power enabled growth but caused tremendous losses of human lives and material damages. Socialization of economy and strict centralization led to a new social structure and established terror as an instrument for social reorganization. WWII revealed the necessity of a correction of these developments, but the events of the Cold War circumvented any further considerations"--Provided by publisher.

*Globalisation and Historiography of National Leaders* Joseph Zajda 2016-12-23 Globalisation and Historiography of National Leaders: Symbolic Representations in School Textbooks, the 18th book in the 24-volume book series

Globalisation, Comparative Education and Policy Research, explores the interrelationship between ideology, national

identity, national history and historical heroes, setting it in a global context. Based on this focus, the chapters represent hand-picked scholarly research on major discourses in the field of history textbooks and symbolic representations of national heroes, and draw upon recent studies in the areas of globalisation, history textbooks, and national leaders. A number of researchers have written on the importance of teaching national history in order to foster national identity and a sense of belonging to a certain society, state, and people among the younger generation. Some nations prefer to create national heroes out of their political leaders who are still in power, and whose lives and reputation are portrayed as being eminently spotless. Using diverse comparative education paradigms from critical theory, social semiotics, and historical-comparative research, the authors analyse the unpacking of the ideological agenda hidden behind the choice and lionization (or silencing) of the preferred national heroes. They provide an informed critique of various historical narratives depicting national leaders and national heroes. The book provides an easily accessible, practical yet scholarly source of information on international concerns in the field of globalisation, history education and policy research. Offering an essential sourcebook of ideas for researchers, history educators, practitioners and policymakers in the fields of globalisation and history education, it also provides a timely overview of current changes in politically correct history education narratives in history textbooks. Political Thought From Machiavelli to Stalin E. A. Rees 2004-03-12 This is the first book in English to explore the relationship between Stalin's ideas and methods, and the practices advocated by Machiavelli and those associated with 'Machiavellian' politics. It advances the concept of 'revolutionary Machiavellism' as a way of understanding a particular strand of revolutionary thought from the Jacobins through to Leninism and Stalinism. By providing a wide-ranging survey of European political thought in the Nineteenth - and early Twentieth-century, E. A. Rees locates the Bolshevik tradition within the wider European tradition.

**Our Daily Bread: Socialist Distribution and the Art of Survival in Stalin's Russia, 1927-1941** Kate Transchel 2015-03-04 Drawing on newly available archival materials including official documents, reports, and personal accounts, this remarkable study presents a detailed picture of the living standards of various social groups in prewar Soviet Russia, and the role of state-controlled distribution of food and goods as a tool of the Stalinist dictatorship. The study offers a new perspective not only on the period of collectivization, industrialization, and terror but also on the regime's most rudimentary method of controlling human behavior and reshaping the social order. In her conclusion the author analyzes the long-term impacts of the Stalinist "dictatorship of distribution", from bureaucratization to rural depopulation to the emergence of a distinctive type of black-market economy.

*Between Prometheus and Realpolitik* Jan Jacek Bruski 2016-12-05 The Treaty of Riga of March 1921 did not signify real peace. It was soon followed by the outbreak of a Polish-Soviet cold war, which in the early 1920s threatened to reach a boiling point. One of the salient fronts on which it was fought was Ukraine and the Ukrainian question. The means by which it was waged – first by Poland, and subsequently, more successfully, by the Soviets – was by attempts to stir up centrifugal tendencies on enemy territory, leading eventually to the splitting up of the neighboring state along its national seams. Polish-Soviet rivalry over Ukraine had flared up at the Riga peace conference. In the following years both antagonists struggled to win over the sympathies of Ukrainians living on either side of the frontier River Zbrucz (Zbruch) and dispersed in various émigré centers, and the weapons employed were propaganda, diplomacy, nationalities policy, economic projects, political subterfuge, and armed irredentism. Jan Jacek Bruski's book addresses the first, very important phase of this Polish-Soviet tussle.

*The Political Thought of Joseph Stalin* Erik van Ree 2003-08-27 This book presents a comprehensive analysis of the political thought of Joseph Stalin. Making full use of the documentation that has recently become available, including Stalin's private library with his handwritten margin notes, the book provides many insights on Stalin, and also on western and Russian Marxist intellectual traditions. Overall, the book argues that Stalin's political thought is not primarily indebted to the Russian autocratic tradition, but belongs to a tradition of revolutionary patriotism that stretches back through revolutionary Marxism to Jacobin thought in the French Revolution. It makes interesting comparisons between Stalin, Lenin, Bukharin and Trotsky, and explains a great deal about the mindset of those brought up in the Stalinist era, and about the era's many key problems, including the industrial revolution from above, socialist cultural policy, Soviet treatment of nationalities, pre-war and Cold War foreign policy, and the purges. On Stalin and Stalinism Roy Aleksandrovich Medvedev 1979 Incorporating an extensive range of materials, including the

personal experiences of many people who lived through the Stalinist years, Medvedev, a dissident Soviet historian, reassesses Stalin's character and actions in a withering indictment of the Stal

**History of Management Thought** Vadim I. Marshev 2021-01-13 This book describes the millennia-long process of the genesis, formation, struggle, and change of views on the management of social organizations in various countries around the world; in other words, it characterizes the worldwide evolution of the History of Management Thought (HMT) - ideas, concepts, theories, paradigms, and scientific schools - from Antiquity to the present. The book is the outcome of extensive research, based on the analysis, generalization, and systematization of foreign and domestic published literature, as well as on the gathering and analysis of unique archival materials. For the first time in the historical and managerial literature, the book puts forward original definitions of three historical and managerial sciences - the History of Management, the History of Management Thought, and the Historiography of Historical and Managerial Research. It addresses the main challenges in pursuing Historical and Scientific Research (HSR), the main "subject" levels of HSR and specific methodological problems concerning HMT, as well as epistemological methods for identifying key factors in and causes of the advent and evolution of HMT. This book presents both the origins of management thought dating back to the 5th millennium BC and the latest management concepts of the early 21st century. In particular, it traces the origins and sources of management thought, reflected in the works of thinkers and statesmen of the Ancient World (Egypt, Western Asia, China, India, Greece, and Rome), the era of feudalism, and the Middle Ages (Byzantium, Western Europe, and England), the era of inception capitalism (Western Europe and the USA), as well as the new and recent history of management thought of the 20th and 21st centuries. In addition, for the first time in History of Management literature, it presents the history of Russian management thought from the 9th century to modern concepts and scientific schools.

*Totalitarian Communication* Kirill Postoutenko 2014-03-31 Totalitarianism has been an object of extensive communicative research since its heyday: already in the late 1930s, such major cultural figures as George Orwell or Hannah Arendt were busy describing the visual and verbal languages of Stalinism and Nazism. After the war, many fashionable trends in social sciences and humanities (ranging from Begriffsgeschichte and Ego-Documentology to Critical Linguistics and Critical Discourse Analysis) were called upon to continue this media-centered trend in the face of increasing political determination of the burgeoing field. Nevertheless, the integration of historical, sociological and linguistic knowledge about totalitarian society on a firm factual ground remains the thing of the future. This book is the first step in this direction. By using history and theory of communication as an integrative methodological device, it reaches out to those properties of totalitarian society which appear to be beyond the grasp of specific disciplines. Furthermore, this functional approach allows to extend the analysis of communicative practices commonly associated with fascist Italy, Nazi Germany and Soviet Union, to other locations (France, United States of America and Great Britain in the 1930s) or historical contexts (post-Soviet developments in Russia or Kyrgyzstan). This, in turn, leads to the reevaluation of the very term »totalitarian«: no longer an ideological label or a stock attribute of historical narration, it gets a life of its own, defining a specific constellation of hierarchies, codes and networks within a given society.

*The Palgrave Handbook of Leninist Political Philosophy* Tom Rockmore 2018-12-19 This intellectually discomfiting, disturbingly provocative, yet still thoroughly scholarly Handbook reproduces the intellectual ferment that accompanied the Russian Revolution including the wholly polarising effect at that time of Vladimir Ilyich Lenin. The Palgrave Handbook of Leninist Political Philosophy does not settle for one safe interpretation of the thought of this world-historic figure but rather revels in a clash of viewpoints. Most interestingly it presents a contrast between the Western editors who emphasise pure democracy and Marxian humanism with many of the contributing scholars who take a more sanguine view of the Leninist political project. Perhaps reflecting the current Western political crisis, some of the volume's other European and North American scholars more closely align with their colleagues from the Global South. Key Features: · Places particular emphasis on the key elements of Lenin's thought – the dictatorship of the proletariat (which is trenchantly defended), the nature of the dialectic and the New Economic Policy · Additional comprehensive coverage includes the theory of the party, Bolshevism, imperialism, and the class struggle in the countryside · Examines the relation of Lenin's thought to the ideas of his most influential contemporaries (including Luxemburg, Stalin and Trotsky) as well as the most eminent thinker to interpret Lenin since his death – György Lukács This Handbook is essential reading for scholars, researchers and advanced students in political philosophy, political theory, the history of political ideas, economics, international relations and world history. It is also ideal for the general reader who wishes to understand some of the most powerful ideas that have shaped the modern world and that may yet shake the world again.
