The Dative William van Belle 1996
Since antiquity, scholars have been fascinated by the phenomena of case. The explanation for this fascination is, as Hjelmslev already pointed out over fifty years ago, the fact that he who can unravel the meaning of case-relations, has the key to

language structure as a whole. For over three years, a team of twenty scholars affiliated with the Linguistics Department of Leuven University in Belgium has concentrated on case phenomena in different languages, both Indo- and non-Indo-European. It is the first time that such a large scale investigation into case has been undertaken. Noteworthy is also its reliance on computer-stored corpora of authentic material. The results are published as a series ("Case and Grammatical Relations across Languages") of which the first volume, a bibliography, appeared in 1994. The first volume on the dative case contains 13 articles, each of which gives a detailed syntactic-semantic description of the dative or its counterparts in a particular

language. In addition to the lexico-syntactic frames in which they occur, a number of textual and extra-linguistic factors are taken into account. Languages investigated are English (K. Davidse), German (L. Draye), Dutch (W. Van Belle & W. Van Langendonck), Afrikaans (L.G. de Stadler), Latin (W. Van Hoecke), French (L. Melis), Spanish (N. Delbecque & B. Lamiroy), Portuguese (R. de Andrade), Polish (B. Rudzka-Ostyn), Hungarian (G. Toth), Pashto (W. Skalmowski), Hebrew (P. Swiggers) and Orizaba Nahuatl (D. Tuggy).

manifestations of genius." Teresa M. Amabile, PhD The Edsel Bryant Ford Professor of Business Administration Harvard Business School [A] clear and engaging summary of this mysterious and utterly important phenomenon written by arguably the world's expert on the topic. Nearly 30 years of Simonton's fascination and focused intellect on the topic of exemplary genius come together in this brief, accessible and insightful volume. If only all introductory courses were this much fun! --Gregory J. Feist, PhD San Jose State University "The latest, and possibly most comprehensive, entry into this genre [on the study of genius] is Dean Keith Simonton's new book Genius 101... world's leading authorities on the intellectually eminent..." --Time Magazine, February 13, 2009 "Genius 101 is an extremely readable and entertaining book: I read it in one sitting....Each chapter is informative, well organized, provocative, and entertaining. This book presents the best short introduction to genius to be found." --Robert Sternberg PsycCritiques Are geniuses born or made? How do psychologists measure "genius"? Is it "genius," or is it "madness"? "Genius," contrary to common belief, is not strictly a matter of intelligence. Intellect, personality, creativity, even serendipity play a significant role in molding a genius. So, what does it mean to be a genius? Genius 101 examines the many definitions of "genius," and the

multiple domains in which it appears, including art, science, music, business, literature, and the media. Dr. Simonton introduces the study of genius theory and the research supporting it, using non-scientific, accessible language-fit for a non-genius. The Psych 101 Series Short, reader-friendly introductions to cutting-edge topics in psychology. With key concepts, controversial topics, and fascinating accounts of up-to-the-minute research, The Psych 101 Series is a valuable resource for all students of psychology and anyone interested in the field.

Grappling with the monster Timothy Shay Arthur 1877

The Holocaust in the East Michael David-Fox 2014-02-07 Silence has many causes: shame, embarrassment, ignorance, a desire to protect. The silence that has surrounded the atrocities committed against the Jewish population of Eastern Europe and the Soviet Union during World War II is particularly remarkable given the scholarly and popular interest in the war. It, too, has many causes—of which antisemitism, the most striking, is only one. When, on July 10, 1941, in the wake of the German invasion of the Soviet Union, local residents enflamed by Nazi propaganda murdered the entire Jewish population

of Jedwabne, Poland, the ferocity of the attack horrified their fellow Poles. The denial of Polish involvement in the massacre lasted for decades. Since its founding, the journal *Kritika: Explorations in Russian and Eurasian History* has led the way in exploring the East European and Soviet experience of the Holocaust. This volume combines revised articles from the journal and previously unpublished pieces to highlight the complex interactions of prejudice, power, and publicity. It offers a probing examination of the complicity of local populations in the mass murder of Jews perpetrated in areas such as Poland, Ukraine, Bessarabia, and northern Bukovina and analyzes Soviet responses to the Holocaust. Based on Soviet commission reports, news media, and other

archives, the contributors examine the factors that led certain local residents to participate in the extermination of their Jewish neighbors; the interaction of Nazi occupation regimes with various sectors of the local population; the ambiguities of Soviet press coverage, which at times reported and at times suppressed information about persecution specifically directed at the Jews; the extraordinary Soviet efforts to document and prosecute Nazi crimes and the way in which the Soviet state's agenda informed that effort; and the lingering effects of silence about the true impact of the Holocaust on public memory and state responses.

Dreamworld and Catastrophe Susan Buck-Morss 2002 The dream of the twentieth century was the construction of mass utopia. As the century closes, this dream is

being left behind; the belief that industrial modernization can bring about the good society by overcoming material scarcity for all has been challenged by the disintegration of European socialism, capitalist restructuring, and ecological constraints. The larger social vision has given way to private dreams of material happiness and to political cynicism. Developing the notion of dreamworld as both a poetic description of a collective mental state and an analytical concept, Susan Buck-Morss attempts to come to terms with mass dreamworlds at the moment of their passing. She shows how dreamworlds became dangerous when their energy was used by the structures of power as an instrument of force against the masses. Stressing the

similarities between the East and West and using the end of the Cold War as her point of departure, she examines both extremes of mass utopia, dreamworld and catastrophe. The book is in four parts. "Dreamworlds of Democracy" asks whether collective sovereignty can ever be democratic. "Dreamworlds of History" calls for a rethinking of revolution by political and artistic avant-gardes. "Dreamworlds of Mass Culture" explores the affinities between mass culture's socialist and capitalist forms. An "Afterward" places the book in the historical context of the author's collaboration with a group of Moscow philosophers and artists over the past two tumultuous decades. The book is an experiment in visual culture, using images as philosophy, presenting, literally, a way of

seeing the past. Its pictorial narratives rescue historical data that with the end of the Cold War are threatened with oblivion and challenge common conceptions of what this century was all about.

Maeve's Times Maeve Binchy 2014-10-28 Five decades of selected writings from the Irish Times by the beloved and best-selling author, filled with her hallmark humor, candor, and wisdom—a timeless gift to her legion of fans. Maeve Binchy once confessed: "As someone who fell off a chair not long ago trying to hear what they were saying at the next table in a restaurant, I suppose I am

obsessively interested in what some might consider the trivia of other people's lives." She was an accidental journalist, yet from the beginning, her writings reflected the warmth, wit, and keen human interest that readers would come to love in her fiction. From the royal wedding to boring airplane companions, Samuel Beckett to Margaret Thatcher, "senior moments" to life as a waitress, Maeve's Times gives us wonderful insight into a changing Ireland as it celebrates the work of one of our best-loved writers in all its diversity-revealing her characteristic directness, laugh-out-loud humor, and unswerving gaze into the true heart of a matter. "Binchy's wry, self-effacing style reminds one of a Celtic Nora Ephron. . . . [She] throws a spotlight on strong,

imperfect women confronting complicated challenges." –The Christian Science Monitor
EU Cohesion Policy John Bachtler
2016-10-26 The Open Access version of this book, available at <http://www.tandfebooks.com/doi/view/10.4324/9781315401867>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. This book brings together academics, members of European institutions, and regional and national level policymakers in order to assess the performance and direction of EU Cohesion policy against the background of the most significant reforms to the policy in a generation. Responding to past criticisms of the effectiveness of the policy, the policy changes introduced in 2013 have aligned

European Structural and Investment Funds with the Europe 2020 strategy and introduced measures to improve strategic coherence, performance and integrated development. EU Cohesion Policy: Reassessing performance and direction argues that policy can only be successfully developed and implemented if there is input from both academics and practitioners. The chapters in the book address four important issues: the effectiveness and impact of Cohesion policy at European, national and regional levels; the contribution of Cohesion policy to the Europe 2020 strategy of smart, sustainable and inclusive growth; the importance of quality of government and administrative capacity for the effective management of the Funds; and the inter-relationships between institutions,

territory and place-based policies. The volume will be an invaluable resource to students, academics and policymakers across economics, regional studies, European studies and international relations.

The Dative William van Belle
1998-01-01 This book is the second part of a two-volume reader on the 'Dative'. In the first part, which appeared in 1996, eleven papers were

presented providing a syntactic and semantic description of the category 'Dative' in eleven languages. The aim of this second part is to discuss several aspects of the Dative in greater detail. It contains eight papers dealing with theoretical considerations on 'dativity' as well as with contrastive, typological and diachronic issues. A major concern is the relation between form (case, grammatical relation) and meaning (semantic roles or other kinds of meaning). Most contributions in this volume represent cognitive and functional views or a critical discussion of them. As in the first volume, the linguistic material mainly stems from Germanic and Romance languages. Contemporary English is the basis for Davidse's theoretical claims; Pasicki studies

the dative in Old English. Dutch appears especially in Geeraerts' semantic analysis, but also in the papers by Draye, Lamiroy & Delbecque and Van Langendonck. Draye, Lamiroy & Delbecque and Melis also take German into consideration. Latin is dealt with by Melis and Van Langendonck. Modern Romance languages, especially French, provide further data for Melis and Lamiroy & Delbecque. Finally, Newman adduces a variety of languages for his typological analyses.

Venture Capital, Entrepreneurship, and Public Policy Vesa Kannianen
2004-12-03 Experts in public economics and financial economics discuss the special role of venture capital and if public policy should promote the venture capital industry; empirical and theoretical perspectives are developed. The existing literature in both public economics and financial economics often fails to consider how

appropriate and effective public policy may be in promoting the venture capital industry. Public economics has dealt extensively with the effect of taxes and subsidies but has neglected the unique role of venture capitalists as active investors who provide not only funding but added value. Financial economics has emphasized the special role of the venture capitalist but has not focused on the real effects of venture capital in industry equilibrium or the role of public policy. This volume in the CESifo Seminar series brings together experts in public and financial economics to develop a theoretically and empirically informed international policy perspective for an era in which policymakers increasingly look to venture capital

as a source of jobs, innovation, and economic growth. The chapters in part I analyze data on the levels of venture capital fundraising in Europe, problems in the bank-oriented beginnings of German venture capital finance in the 1970s, and the inefficiency of Canadian labor-sponsored venture capital funds. Part II looks at the effect of venture capital on labor market performance, the importance of exit opportunities, and the effect of information inflows on the venture capital cycle. The chapters in part III take the perspective of public economics, reviewing the role of public policy in addressing potential market failures, improving the quality of venture capital investments, and affecting entrepreneurial business activity through tax policy.

Qualitative Inquiry and Global Crises

Killing ideas softly? Ronald A. Beghetto 2013-06-01 Creativity is a hot topic in education. As such, there is no shortage of insights or suggestions for how teachers might incorporate creativity into their curriculum. Wading through these

suggestions can, however, be quite daunting. This is because many of these suggestions imply that teachers need to somehow radically change their approach to teaching, adopt a new curriculum, or add-on to their existing curriculum. Consequently, many teachers feel that such changes are not feasible and may even come at the cost of supporting students' academic learning. This book provides an alternative. Teachers need not adopt a new curriculum, radically change what they are already doing, or attempt to add more to their already overflowing plate of curricular responsibilities. Rather, teaching for and with creativity is often more about doing what one is already doing, only slightly better. The aim of this book is to help teachers understand how they can make

slight changes to their own teaching, which can substantially support the development of students' creative potential and result in a more creative approach to teaching. The insights and practical suggestions presented in this book represent some of the newest and most promising work being done in the field of creativity studies. This book is unique in that it presents teachers with concrete ideas for how to simultaneously support creativity and learning. A particularly novel feature of this book is that it offers a blend of theoretical insights and vivid classroom examples to illustrate the kinds of opportunities and challenges that teachers face when they attempt to teach for and with creativity. As such, this book will provide teachers, scholars, researchers, and

anyone interested in classroom creativity with new directions for future research and educational practice.

Polish Romantic Drama Adam Mickiewicz

1997 This is the first volume in English to be devoted entirely to Polish Romantic drama. It contains translations of three major plays: *Forefathers*; *Eve, Part III*, by Adam Mickiewicz; *The Un-Divine Comedy* by Zygmunt Krasinski; and *Fantazy* by Juliusz Slowacki. In his highly informative introduction, Professor Segel discusses the plays against the background of the Romantic movement in Poland and points out their ideological and artistic importance. As products of a revolutionary Poland; they were written and published in Paris by writers who either resettled there after the

Insurrection of 1830 or otherwise identified with the Great Emigration; they are permeated with the spirit of Romantic Rebellion, with pleas for universal justice, and with queries concerning the role of the poet in society. Brilliant productions of the plays in Poland in the late nineteenth and early twentieth-centuries gave impetus to an entire tradition of modern Polish theatrical experimentation as well as dramatic writing which extends to the present day.

Valences of the Dialectic Fredric Jameson 2009 One of the most accomplished literary and cultural critics in the world, Fredric Jameson returns to the philosophy of the dialectic in a grand and nuanced study of the concept and those who have developed it. The question of

the dialectic remains at the center of contemporary theoretical debates: Is it Hegelian and idealistic? To what degree is it central to Marxism? Is a materialist dialectic really possible? How damaging are the "poststructuralist" critiques of the dialectic by Deleuze, and Laclau and Mouffe? Valences of the Dialectic addresses these questions, and studies individual thinkers both dialectical and anti-dialectical, from Hegel and Fichte to Heidegger, Sartre, Derrida, Deleuze and Lacan.

Improving Learning Transfer Cyril Kirwan 2009 Cyril Kirwan's book addresses this critical issue at a number of levels. Firstly, it explores what learning transfer actually is (it's about application

of learning back at work, as well as maintenance of that learning over time). Secondly, it describes the main factors that affect transfer, in terms of trainee characteristics, training design factors, and work environment characteristics. It also examines how those factors exert their effect, which ones are more important, how they interact with one another, and in doing so constructs a practical learning transfer model for practitioners. The book also describes in some detail what the various factors working for or against learning transfer look like in practice. Finally, using case studies, it points the way towards what can be done before, during and after training to improve the rate of transfer.
